

SOPRREMA

SENTINEL

COPPER ART & SILVER ART

# INNOVATION

Easy to install, flexible and attractive, Sentinel Co beautiful, durable and high performance waterproof

At SOPREMA, innovation is the fabric of our heritage and Sentinel PVC systems continue that heritage. Sentinel Copper Art® and Silver Art® roof systems faithfully replicate the appearance of standing seam metal roofs. Left smooth and flat, or with the addition of profiles, Sentinel Copper Art® and Silver Art® membranes provide a remarkable visual impact.

Steeper sloped roofs can be covered with Sentinel thermoplastic membranes to provide the look of metal with the flexible performance of high-quality vinyl roof protection. Standing seam metal roofs are dependent on underlayment membranes for moisture protection, whereas the uniquely blended Sentinel Copper Art® and Silver Art® PVC formulations stop the threat of water infiltration at the exposed membrane surface.

Copper Art® & Silver Art® promise roofing solutions.

Sentinel Copper Art® and Silver Art® utilizes an innovative process whereby metal is incorporated into the PVC formulation producing a thermoplastic membrane with the aesthetics created by the natural weathering of metal. All this without the risks associated with traditional metal roofing; thermal bridging, air tightness, corrosion and water ingress at penetrations and other roof details.

Copper Art® and Silver Art® systems provide a striking and enduring finish. They are lightweight and easy to install, mechanically fastened or fully adhered; making Sentinel PVC membranes a preferred choice for new roof construction and large retrofit projects. The systems are compatible with most supporting structures including metal, wood, and concrete. Vapor retarders and barriers can be incorporated with insulation boards to comply with all necessary environmental and climatic conditions.

Combining the beauty of traditional materials with modern technology, SOPREMA's innovative metallic PVC membranes – Sentinel Copper Art® and Silver Art® – provide architects, consultants, contractors, and building owners with unlimited possibilities.

INNOVATIVE BUILDING ENVELOPE SOLUTIONS  
ROOFING • WATERPROOFING • WALL SYSTEMS • CIVIL ENGINEERING

SOPREMA offers a comprehensive line of roofing, waterproofing, wall protection and civil engineering solutions, combining superior products and systems with decades of proven performance. Our solutions include industry leading SBS-modified bitumen membranes, polymeric and modified bituminous liquid applied membranes, and synthetic single ply PVC membranes. For applications as diverse as roofing, below grade waterproofing, plaza deck and balcony waterproofing, air and vapor barriers and bridge and parking structures, SOPREMA has the solution. Our relentless pursuit of technological advancement, sustainability and product quality has been known and respected around the world for over 100 years.
