

Afraid of being burned by hot rubber?

COLPHENE LM BARR

A safer, more efficient
cold-applied solution

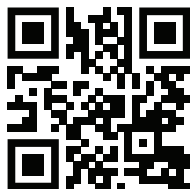

SAFE AND EFFICIENT

- No more risk of burns to personnel from hot rubberized asphalt
- Installs 50% faster than HRA
- No priming steps required, sprayable straight from the pail
- Rain ready in minutes, not hours
- Can be applied to green concrete for fast-tracked projects

A MORE SUSTAINABLE SOLUTION

- Meets the same performance specification with 30-40% less material
- Resilient and durable
- Low odor, with no fumes
