Pre-Vegetative Sedum-Mix Tile

APPLICATIONS

VEGETATED

PRODUCT DATA SHEET PDS10340 - REV 231020

PRODUCT NUMBERS:

- W3029 - 24 x 12 in (191 x 1.22 mm) - Tile

DESCRIPTION & FEATURES:

SOPRANATURE SEDUM TILES have a coconut fiber base to assure effective rooting of plants to the underlying growth medium and hold the tile together for easy installation.

SOPRANATURE SEDUM TILES offer simple and immediate coverage for vegetative roof systems that require minimal maintenance after installation. Available in four standard mixes suitable for a variety of conditions.

- **ALL SEASONS** is a good, general-purpose mix that provides year-round beauty. Winter interest and seasonal foliage color changes are also found in this group.
- **TUFF STUFF** includes some of the toughest, drought resistant choices available. They have proven ability to survive tough environments that oftentimes limit plant choices.
- **COLOR MAX** includes a blend of sedums for use when maximum color is desired. Brightly-colored foliage and abundant flowers that blend well together characterize these carefully-selected sedums.
- **SHADE MIX** sedums are those that have demonstrated abilities to withstand the difficult conditions of shade.

APPLICATION:

Place **SOPRANATURE SEDUM TILES** directly over a minimum of 2 in freshly dampened growth media. Avoid gaps between the growth media and the tile. Water immediately after installation and consult maintenance guidelines for continued care.

Refer to SOPREMA's published technical literature for additional details and application requirements.

STORAGE:

Unpack **SOPRANATURE SEDUM MATS** immediately after delivery to avoid plant spoilage. Install mats within 48 hours of delivery. Until installation keep the material in a cool place avoiding direct sunlight where the tiles can dry out.
