

SOPREMA #12 DP FASTENERS

Soprema #12 DP Fastener - Package Quantities Below

Order No. - See Below

Soprema #12 DP Preassembled Insulation Fastener - Package Quantities Below

Order No. - See Below

DESCRIPTION

Soprema #12 Insulation Fasteners and #12 Pre-Assembled Insulation Fastener/3-inch Plate Combination are engineered for the attachment of insulation to FM Approvals Listed 18-22 Ga. steel decks and to specific type wood decks. The fastener must achieve a penetration depth of three-quarter (¾) inch (19 mm) min. through steel and wood to achieve maximum performance. Fasteners should be installed using an 1800-2500 RPM screw gun.

The #12 Insulation and Pre-Assembled Insulation Fastener/Plate Combination Fasteners offer these advantages:

- Superior pullout performance
- Specifically designed thread for increased back-out resistance
- FM Approvals, ICC/ES, Miami-Dade County, Florida State-Wide Approval
- Approved for steel and specific types of wood decks
- Soprema's flexibility to supply warranted fasteners based on the contractors preferred fastener request or applicator tools used
- Pre-Assembled Fastener/Plate combination reduces the chance of fastener being driven at an angle.
- Use an approved "stand-up" tool to achieve maximum installation performance.

COMPOSITION & PACKAGING

Soprema supplied #12 DP Fastener is case hardened carbon steel and use specific head, shank and thread diameters, point types and head styles meeting FM Approvals corrosion and simulated wind uplift criteria requirements.
