

# SOPREMA #15 HD FASTENERS

Soprema #15 HD Preassembled Insulation Fastener - Package Quantities Below

Order No. - See Below

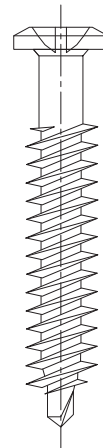

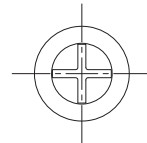

## DESCRIPTION

Soprema #15 HD fastener is engineered to provide exceptional performance in a variety of substrates and applications including: insulation, SBS membrane plate and batten bar seam applications and metal edge/termination bar securement.

Fasteners are designed for the attachment of insulation and membrane to steel (18-22 ga.), wood, and structural concrete. To meet FM requirements, the fastener must penetrate the steel deck three-quarter (¾) inch. Minimum penetration is one (1") inch into wood, three-quarter (¾) inch through wood that is less than three-quarter (¾) inch thick and one and one-quarter (1 ¼) inch into concrete. When installing in concrete, pre-drill using a seven-thirty-second (7/32") inch drill bit and drill pilot hole one-half (½) inch deeper than the required embedment. Install the fastener using a clutch-driven drill motor with a maximum 1500 RPM.

The #15 Fastener offers these advantages:

- Superior pullout performance
- Specific designed thread for increased back-out resistance
- FM Approvals, ICC/ES, Miami-Dade County, Florida State-Wide Approval
- Approved for steel, wood and concrete decks
- Soprema's flexibility to supply warranted fasteners based on the authorized Soprema roofing applicator's preferred fastener request or applicator tools used
- Used with Soprafix and UNILAY Mechanically Fastened Systems

## COMPOSITION & PACKAGING

Soprema supplied #15 HD Fastener is case hardened carbon steel and use specific head, shank and thread diameters, point types and head styles meeting FM Approvals corrosion and simulated wind uplift criteria requirements.

Fastener Size	#15 HD Fastener Part Number	Qty. / Pail
1-1/4"	F1026	1000
2"	F1027	1000
3"	F1028	1000
4"	F1029	1000
5"	F1030	1000
6"	F1031	500
7"	F1032	500
8"	F1033	500
9"	F1034	250
