

SENTINEL® PVC PROFILE BAR

APPLICATIONS

ROOFING

PRODUCT DATA SHEET PD10179-Rev. 220505

DESCRIPTION:

SENTINEL PVC Profile Bars are extruded, pliable PVC bars designed to provide PVC membrane with the appearance of a standing seam metal roof. They are available in white, copper and silver. Special colors are also available. Each profile is 9.8 (3m) feet long, 1.4 inches (3.5 cm) in width. Each profile has a weld base of 1.35 inches (3.4 cm) to attach the bar to the membrane.

APPLICATION:

Installation of the SENTINEL PVC Profile bar is done by hot air welding. The profile bar can be installed on both flat and curved surfaces, and can be applied on any slope. When installing the profile bar, tack weld the bar in place to ensure it is straight prior to heat welding it in place. Refer to SOPREMA's specifications and installation instructions for additional application guidelines.

STORAGE:

All materials must be stored in a clean, dry location and cover as necessary to protect from environmental damage such as extreme cold, heat or moisture. Monitor varying environmental conditions during storage, handling and applications.

QUICK FACTS

WIDTH (in)	HEIGHT (in)	LENGTH (ft)
1.4 (3.5 cm)	1.2 (3.1 cm)	9.8 (3.0 m)
