

# SOPRANATURE<sup>®</sup>

## INSPECTION CHAMBER

Aluminum Drain Cover and Protector

APPLICATIONS

VEGETATED SOLUTIONS

PRODUCT DATA SHEET PD10462 - REV.220506

### DESCRIPTION:

SOPRANATURE INSPECTION CHAMBER is made of 0.051 in (16 ga.) 5052-H32 aluminum with an untreated surface. It is 12 in (305 mm) in width and depth, and 5.8 in (148 mm) in height. (Other heights are available.) The door is equipped with a latch so it can be locked up if required.

The INSPECTION CHAMBER makes drain inspection easier during the maintenance of the green roof. It also protects the drain against debris, dead leaves, gravel, etc.

### INSTALLATION:

Place the INSPECTION CHAMBER on the roof so as to cover the drain. Pour gravel around the drain while ensuring the flaps of the INSPECTION CHAMBER are properly covered, in order to hold the cage in place.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.
