

# SOPRANATURE® PAVER PEDESTAL

Paver Pedestal and Accessories

APPLICATIONS

VEGETATED

PRODUCT DATA SHEET PDS10460 - REV 231106

## PRODUCT NUMBERS:

*For ordering information contact customer service.*

## DESCRIPTION & FEATURES:

**SOPRANATURE PAVR PEDESTALS** support paving blocks on pedestrian traffic terraces. Manufactured from injection molded polypropylene, **SOPRANATURE PAVR PEDESTALS** consist of a head screw nut assembly with an 8 in (200 mm) wide base plate. **SOPRANATURE PAVR PEDESTALS** allow for the adjustment and the leveling of paving blocks and are available in 6 references for heights from 1 to 10.2 inches (25 to 260 mm).

- Available in varying heights to suit a variety of applications
- Fast and easy installation - promotes labor savings
- Screw-to-adjust pedestals ensure perfectly level decks
- Impervious to water, mold and freeze/thaw cycles

## APPLICATION:

**SOPRANATURE PAVR PEDESTALS** can be installed on any base designed to support the load of the entire pedestal system. Since the installation of a plaza deck requires additional structural resistance in an existing building, SOPREMA recommends an in-depth analysis of its capacities by a building structural engineer.

Pedestals are packaged with the top and base fully assembled in the pedestal's lowest height position. To increase the height, simply hook the key on the screw nut in the center of the paver pedestals, turn the key clockwise to lower the threaded screw on the support and turn counterclockwise to raise it. DO NOT extend the height of the pedestal past the built-in thread engagement indicators unless adding an EXTENSION.

At the corners or on the edges of the terraces, the head spacers should be leveled using a cutter, cutting pliers or a hacksaw.

Refer to SOPREMA's published technical literature for additional details and application requirements.

## STORAGE:

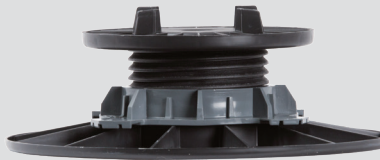

Store boxes in an upright position to prevent damage. Store in a clean, dry location and cover as necessary to protect from environmental damage such as extreme cold, heat or moisture.

## WARRANTY:

For more information refer to [www.SOPREMA.us](http://www.SOPREMA.us) or contact your SOPREMA representative.

## ACCESSORIES

### 110 MM EXTENSION

The EXTENSION is designed to increase the height of the PAVER PEDESTALS.

### SLOPE CORRECTOR

The SLOPE CORRECTOR allows to compensate horizontal slopes from 0-5%.

### CUSHION

Designed to absorb shock and prevent paving blocks from moving by improving their stability.

### PEDESTAL EDGE KIT

The border kit allows the peripheral finish of your terrace by dressing its fallout.

### PERIPHERAL SUPPORT

The peripheral support makes it possible to obtain maximum support surface for the edge slabs without having to cut the pedestals.

### PEDESTAL KEY

The adjustment key allows you to adjust the pedestal heights.
