

ALSAN[®] CIVIL P70

WATERPROOFING

ALSAN CIVIL P70 is a rapid-setting, polymethyl methacrylate (PMMA) primer. ALSAN CIVIL P70 is formulated to promote adhesion over concrete and steel surfaces prior to application of ALSAN CIVIL waterproofing systems. ALSAN CIVIL is used for waterproofing bridges, parking decks, and various other civil engineering structures.

- Rapid curing and easy application provides same-day installation
- Compatible with ANTIROCK waterproofing membrane
- Can be used for most repair work, when combined with silica sand

RELATED PRODUCTS

ANTIROCK

An SBS-modified bitumen membrane designed to waterproof bridge decks, featuring ceramic-coated granules on the top side and polyolefin burn-off film on the underside to facilitate heat welding.

ALSAN CIVIL 755

A three-component polymethyl methacrylate-based (PMMA) waterproofing sprayable liquid membrane.

QUICK FACTS

PACKAGING	18 kg pails or 180 kg drums
APPLICATION TEMPERATURE	32 to 95°F (0 to 35°C)
POT LIFE	15 Minutes @ 68°F (20°C)
RAINPROOF	30 Minutes @ 68°F (20°C)
FULLY CURED	3 Hours @ 68°F (20°C)
APPLICATION	 SPRAY  ROLLER  SQUEEGEE
